

View your **Fire Pump** room from the comfort of your own web browser!

Introducing... the **FIRE PUMP GATEWAY!**

The Rosemont **FIRE PUMP GATEWAY** is installed in your **Fire Pump** room, allowing you to view ...

- Suction Pressure
- System Pressure
- Fire Pump Run Status
- Jockey Pump Run Status
- Jockey Pump Overload Status
- Pump Room Temperature
- Pump Casing Temperature

... all on any web based browser!

We go **IN** the pump room, so you can get **OUT** of the pump room!

**Cloud Control** -The Fire Pump Gateway connects to **IntegraSense-OnSite**; a web-hosted database where your fire pump room event history is securely stored. Your customized website will display your system parameters in a number of easy to use pages.
